Simple and Efficient Synthesis of the Acetylene Equivalent (E)-1-Benzenesulfonyl-2-(trimethylsilyl)ethylene.

— The title acetylene equivalent (III) is readily synthesized in a one- pot reaction via iodosulfonylation-dehydroiodination of (vinyl) trimethylsilane (I). — (GRIGG, R.; NAJERA, C.; SANSANO, J. M.; YUS, M.; *Synth. Commun.* 27 (1997) 6, 1111-1114; Sch. Chem., Leeds Univ., Leeds LS2 9JT, UK; EN)
