

# INEXPENSIVE automatic BURETTES

USEABLE WITH ANY SIZE BOTTLE  
AVAILABLE WITH OR WITHOUT STOPCOCKS  
CHOICE OF THREE TYPES OF GLASS.

For all around convenience and economy, these SGA burettes are unequalled. Accurate within plus or minus 0.15 ml., they are just the thing for routine measurement of solutions and for student use. Use of a rubber stopper connection makes these burettes adaptable to any size bottle. They are filled by applying pressure to the rubber bulb, forcing the liquid up the center tube to overflow into the graduated column. When the pressure is released, the zero mark sets in automatically. All sizes are graduated in intervals of 1/10 ml. Select from the six variations to suit your needs, complete as illustrated, without bottle or rubber stopper.

J-835

J-835, Burette with stopcock, made of PYREX brand glass No. 774.

J-836, like J-835, but made of lime glass for alkali solutions.

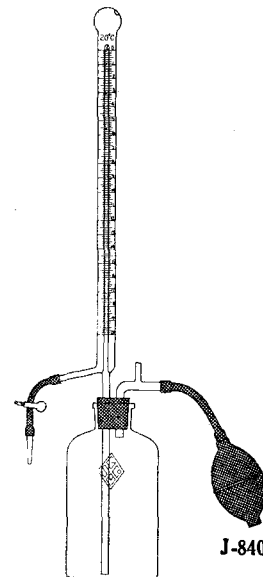

J-837, like J-835, but made with Shellback blue stripe glass for easy reading.

J-840, Burette with pinchcock, made of PYREX brand glass No. 774.

J-841, like J-840 but made of lime glass for alkali solutions.

J-842, like J-840 but made with Shellback glass.

Capacity	J-835	J-836	J-837	J-840	J-841	J-842
10 ml.	\$4.00	\$3.30	\$3.75	\$3.00	\$2.50	\$2.60
25 ml.	4.70	3.85	4.15	3.70	3.05	3.20
50 ml.	5.45	4.70	5.15	4.35	3.60	3.90

## WELCH SPECTROMETER

with **ANGSTROM** and **DEGREE SCALES**

**Cross-Hair Illuminator available**

a new  
development

... in spectrometers

- accurate • versatile
- easily operated
- economical to own

No. 3692

- adjustable micromotion slit
- fine adjustment tangent screw
- locking device

This is a splendid elementary spectrometer. It is convenient and is sufficiently rugged to be used by students who are being introduced to spectrometric methods of analysis.

The unique Angstrom scale is a time-saver. It is a valuable teaching instrument.
