

GUIDELINES FOR CONTRIBUTORS

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES considers manuscripts reporting original clinical or laboratory investigations, reviews, case reports, and rapid communications. Papers on all subspecialties are invited, especially cardiology, infectious diseases, pulmonary and critical care, nephrology, and hypertension. Each manuscript must be accompanied by a statement indicating that the material has not been previously published elsewhere and is being considered solely by AJMS. In addition, the submission must be accompanied by a completed copyright transfer form. All clinical research should be conducted in accordance with the guiding principles for human experimentation summarized in the latest version of the Helsinki Declaration. When reporting experiments on animals, indicate which guideline on the care and use of laboratory animals was followed. Include permission to reproduce previously published material or to use illustrations that may identify human subjects.

Manuscripts. All manuscripts should be submitted in triplicate with triplicate figures and tables. The manuscript should be typed double-spaced on one side of $8\frac{1}{2} \times 11$ -inch paper with 1-inch margins on all sides. Manuscripts should not be stapled. The format should be as follows: title page, abstract, introduction, methods, results, discussion, acknowledgments, references, tables (each on a separate page), figure legends, and figures. Begin each section or component on a new page. Figures should be no larger than 8×10 inches. Use Arabic numerals. Upon acceptance for publication, send the manuscript on disk, labeled with author name(s), article title, and software used (Microsoft Word is preferred, but other software is acceptable).

Title Page. The title page should carry (1) the title of the article, which should be concise but informative; (2) each author's name, with his or her highest academic degree and institutional affiliation; (3) the name, address, phone, fax, and E-mail of the author responsible for correspondence concerning the manuscript; (4) sources of support in the form of grants, equipment, or drugs; (5) disclaimers, if any, including notices of the manuscript's prior appearance as a preliminary report or abstract; and (6) a short title of no more than 40 characters and spaces.

Abstract. The abstract should not exceed 150 words [250 words for structured abstracts (Background, Methods, Results, Conclusions) which are required for reports of original investigations]. The abstract should state the purposes of the study or investigation, basic procedures, main findings, and the principal conclusions. It should emphasize new and important aspects of the study or observations.

Key Words. A list of no more than five key words or short phrases that will assist in cross-indexing should be provided. Terms from the medical subject headings (MeSH) list of *Index Medicus* should be used, if available.

References. References should be numbered consecutively in the order in which they are first mentioned in the text. There should be no more than 40 references. Identify references in text, tables, and legends by superscript Arabic numerals. Avoid using abstracts as references. References to papers accepted but not yet published should be designated as "in press"; authors should obtain written permission to cite such papers as well as verification that they have been accepted for publication. Information from manuscripts submitted but not accepted should be cited in the text as "unpublished observations" with written permission from the source. Avoid citing a personal communication unless it provides essential information not available from a public source, in which case the name of the person and date of communication should be cited in parentheses in the text. Authors should obtain written permission and confirmation of accuracy from the source.

Use the style of the examples below. In all cases, list the first three authors and/or editors, followed by "et al." The titles of journals should be abbreviated according to the style used in *Index Medicus*. A list of these abbreviations can be obtained from the NLM's Web site (<http://www.nlm.nih.gov/>).

For more examples, see <http://www.ama-assn.org/public/journals/jama/sc6336.htm> or JAMA 1997;277(11):927-34.

Parkin DM, Clayton D, Black RJ, et al. Childhood leukaemia in Europe after Chernobyl: 5 year follow-up. *Br J Cancer* 1996;73:1006-12.

Phillips SJ, Whisnant JP. Hypertension and stroke. In: Laragh JH, Brenner BM, editors. *Hypertension: pathophysiology, diagnosis, and management*. 2nd ed. New York: Raven Press; 1995. p. 465-78.

Bengtsson S, Solheim BG. Enforcement of data protection, privacy and security in medical informatics. In: Lun KC, Degoulet P, Piemme TE, et al, editors. *MEDINFO 92. Proceedings of the 7th World Congress on Medical Informatics*; 1992 Sep 6-10; Geneva, Switzerland. Amsterdam: North-Holland; 1992. p. 1561-5.

Figures. Number figures consecutively in the order of their first citation in the text. Send sharp, glossy, black-and-white photographic prints no larger than 8×10 inches. High-quality laser printouts are also acceptable. Letters, numbers, and symbols should be clear and even throughout and of sufficient size that each item will still be legible when reduced for publication. Titles and detailed explanations belong in the legends for figures, not on the figures themselves. Each figure should have a label on its back indicating the number of the figure, author's name, and top of the figure. Do not write on the back of figures, bend figures, mount figures, or use paper clips. Photomicrographs should have internal scale markers; symbols, arrows, or letters used should contrast with the background. If photographs of people are used, the subjects must be unidentifiable or the subjects must have provided written permission to use the photograph. If a figure has been published, acknowledge the original source and submit written permission from the copyright holder to reproduce the material. Permission is required irrespective of authorship or publisher, except for documents in the public domain.

Tables. Type or print out each table, double-spaced, on a separate sheet of paper. Number tables consecutively in the order of their first citation in the text and supply a brief title for each. Be sure that each table is cited in the text. Do not use internal horizontal and vertical rules. Place explanatory matter in footnotes, not in the heading. Explain in footnotes all abbreviations used in each table. For footnotes, use the following symbols, in this sequence: *, †, ‡, §, ||, ¶, #, **, ††, etc. If you use data from another published or unpublished source, obtain permission and acknowledge them fully.

Abbreviations and Nomenclature. Abbreviations and nomenclature should conform to the *American Medical Association Manual of Style*, 9th ed. Abbreviations should be kept to a minimum in the text and should be defined at first usage. Periods are not used after abbreviations (eg, mm, mL). Generic names are preferred for drugs. Use of SI (Système International) units is preferred but not required.

Rapid Communications. Rapid communications should contain new and important research that justifies their accelerated appearance. Manuscripts cannot exceed six double-spaced pages, including figures, tables, and references. The manuscripts will undergo a detailed editorial review and will be accepted, accepted with revision, or rejected. After acceptance, the manuscript will be published within 3 months.

Copies and Reprints. An order form detailing the costs of reprints will be included with page proofs. Reprint requests should be addressed to Lippincott Williams & Wilkins, 301 W. Camden Street, Baltimore, MD 21201-2436; fax, 410-528-4434; E-mail, reprints@lww.com.

Mail Manuscripts to: Kent A. Kirchner, M.D., Editor-in-Chief, *The American Journal of the Medical Sciences*, Veterans Affairs Medical Center, Medical Service, 1500 E. Woodrow Wilson Drive, Jackson, MS 39216.

Page Charges. Authors will be billed a publication page rate of \$40 per printed page. Authors will also be charged for color figures. Page charges and color charges will be billed by and are payable to the publisher.

Each author must read and sign the following statements: (1) Authorship Responsibility; (2) Financial Disclosure; and (3) Copyright Transfer or (3-b) Federal Employment. If necessary, photocopy this document and distribute to co-authors for their original ink signatures. Please compile all forms and send to the attention of Rosemary Hoffman, Ph.D., Managing Editor, *The American Journal of the Medical Sciences*, Medical Service 111), VA Medical Center, 1500 East Woodrow Wilson Drive, Jackson, MS 39216.

Authorship Responsibility: I certify that I have participated sufficiently in the conception and design of this work, the analysis of the data (where applicable), as well as the writing of the manuscript, to take public responsibility for it. I believe the manuscript represents valid work. I reviewed this manuscript (original version) and approve its submission. If I am listed above as corresponding author, I will provide all authors with information regarding this manuscript and will obtain their approval before submitting any revision. Neither this manuscript nor one with substantially similar context under my authorship has been published or will be submitted for publication elsewhere while under consideration by *The American Journal of the Medical Sciences*, except as described in an attachment. Furthermore, I attest that I shall produce the data on which the manuscript is based for examination by the editors or their assignees should they request it.
