

HPLC 2000

The 24th International Symposium on High-Performance Liquid-Phase Separations and Related Techniques will be held June 24–30 in Seattle, WA. Highlighting the program will be an opening plenary lecture by Charles Cantor of Boston University entitled “Macromolecular Diagnostics—Next Generation High-Throughput Technology,” a plenary lecture by Klaus Mosbach of Lund University (Sweden) on “Various Configurations and Their Use of Molecularly Imprinted Polymers,” and a plenary lecture by Egil Jellum of the University of Oslo (Norway) on “CE and CE/MS/MS for Diagnosis of Human Disease.”

Other plenary lectures by prominent scientists and more than 600 contributed papers are also on the agenda. Discussion sessions will be held to explore other topics in depth. Exhibitions will feature the latest in hardware, software, and consumables related to separation science.

Registration for the meeting begins on Sunday, June 25, from 3 to 8 p.m. On-site registration fees are \$695 for industry, \$535 for academia, \$375 for one-day passes, and \$200 for students.

For information on housing, transportation, and registration, contact Janet Cunningham, HPLC 2000 Symposium Manager, Barr Enterprises, P.O. Box 279, Walkersville, MD

Program

Monday

Opening Plenary Lectures

New Directions in CE/MEKC/Isotachopheresis

Method Development and Validation

Pharmaceutical and Combinatorial Analysis

New Directions in HPLC

Tuesday

Advances in Electrochromatography

Miniaturized Techniques/Microfabrication and Chip Technology

Novel Applications

Fundamental Concepts and Retention Mechanisms

Wednesday

New Developments and Advances in Separation Science Technology

Hyphenated and Multidimensional Techniques

Analytical Biotechnology, Genomics, and Proteomics

Thursday

Chiral Recognition and Separation of Stereoisomers

Sample Manipulation and Purification

Characterization of Column Materials and Column Technology

Friday

Preparative and Process Techniques

Detection Schemes and Instrumentation

Novel Applications

Closing Plenary Lectures
