

SCIENTIST'S BEST FRIEND

.... AN
ISCO
GOLDEN
RETRIEVER

ISCO's golden fraction collector will become your pal faster than the cutest furry kind of retriever. It will hold 210 test tubes but measures only 13 x 26 inches. Any tube from 13 to 18 mm diameter will fit without adapters. It will count drops, multiple siphon discharges, or time intervals for each tube. It is available with two different controllers, either of which are in their own cabinets and can be removed from the main unit for remote operation.

The removable racks circulate in a continuous pattern and will retrieve from two columns simultaneously. Both lateral and transverse movement is accomplished with just one motor and two spur gears: there are no chains, belts, ratchets, or levers to wear or become unsynchronized. The base is 1/4" thick solid aluminum—you can't damage it. Its gold anodized finish resists stains and wear. The Delrin racks can withstand almost anything spilled on them. Two models are available, priced from \$650 to \$850.

Here's Mettler's latest catalog on analytical balances

This 22-page catalog covers every feature and spec of Mettler's line of analytical balances. Described are the H balances—from the low-cost student model to automatic printout and sophisticated electronic units. Included are macros, semi-micros, micros and ultra-micros.

All are available from major laboratory supply dealers for demonstration, trial or immediate delivery.

For your copy of the new catalog, write Mettler Instrument Corp., 20 Nassau St., Princeton, N.J. 08540.

NO₃ in soil

Measure water-soluble nitrates quickly and simply. Technique consists of mixing a known weight of soil with a known volume of solution — the analysis is made with an IONALYZER[®] Nitrate Electrode and a Model 404 Specific Ion Meter. Read nitrate DIRECTLY in parts per million on the special ion scale, regardless of solution color or turbidity. This completely portable system allows on-the-spot field measurement with laboratory precision. Another example of the new technology for chemical measurement — from ORION.

automatic
conversion
to linear
absorbance

MODEL 41 DATA READER

Now you can read Model 111 and other Spectrophotometers, pH Meters and Computer Systems *twice as fast, three times more accurately* with the Model 41 Digital Data Reader than by reading the same data from dials or scales. Reference value is set automatically by a touch of the SET-REF bar. It is no longer necessary to adjust your meter to exactly 100%T or 0.00A. The Model 41 automatically converts %T output to digital linear absorbance readings. *Request Bulletin A-324.*
