## RESULTS OF THE ALL-UNION SOCIALIST COMPETITION FOR THE THIRD QUARTER OF 1969

The Committee of Standards, Measures, and Measuring Instruments attached to the USSR Council of Ministers together with the central committee of the Engineering Workers Trade Union have summed up the results of the All-Union socialist competition of the personnel of the Committee of Standards' Organizations and Enterprises for the Third Quarter of 1969. The best production indices for the period under consideration were attained by the Belorussian Republican State Inspection Laboratory (RLGN) (Laboratory head P. V. Yanus, party secretary V. I. Kuleshov, T.U. chairman É. I. Vladyko).

The Personnel of the Belorussian RLGN was Declared Winner of the All-Union Socialist Competition. The laboratory has been awarded the challenge Red Banner of the USSR Council of Ministers and the All-Union Central Committee of Trade Unions (VTsSPS) and presented with a monetary prize.

The personnel of the Belorussian RLGN has successfully fulfilled all its production targets and attained an effective control of the implementation of suggestions and measures for eliminating the discovered defects.

During the period under consideration the laboratory has established a metrological council whose task consists of solving the technical and metrological problems and developing the art of measurements in the Republic.

The Highest Monetary Prizes with the presentation of the challenge Red Banner of the Committee of Standards, Measures, and Measuring Instrument and the central committee of the Engineering Workers T.U. were awarded to the personnel of:

The Gor'kii Interregional State Inspection Laboratory (MLGN) (laboratory head B. V. Vytnov, party secretary B. V. Molodov, T.U. chairman T. N. Kutanova).

The personnel of the laboratory carried out important work in registering the normalizing and technical documents, establishing a system for a graphic analysis of the application of standards at the plants and the reasons for delays in this work. This system ensures the planning of work for supervising standards. Work has started on organizing the hiring of instruments.

The Khar'kov experimental plant "Pribor" (director P. A. Nikritin, party secretary V. M. Prussakov, T.U. chairman Z. I. Veselyi).

The personnel of the plant has considerably improved the production indices as compared with the previous quarter. Important work has been carried out in producing new measuring equipment. An installation for mass testing of electricity meters was produced, instrument UPO-6M was prepared for mass production, a nomenclature of spare parts and material-utilization norms were developed for ten new radio instruments, the production of a scale-plotting machine was started, a new department for manufacturing ÉOP-66 tubes has been organized, and the optical department has been substantially extended.

The Second Highest Monetary Prizes have been awarded to the personnel of:

The Kirgiz RLGN (laboratory head V. K. Guzeev, party secretary G. I. Babich, T.U. chairman I. P. Galanov).

In the period under consideration the laboratory personnel has developed scientific-research work in the field of the economic analysis of standardization and metrology, and carried out important work for improving the condition of the measuring equipment in the national economy of the Republic.
