

METTLER BALANCES ARE TRULY MODERN

A Memorable Antique...

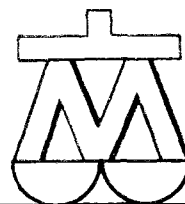

The early steam locomotive was the marvel of the age. It could pull 80 or 90 tons of freight about 15 miles per hour at a cost of approximately 7 cents per ton per mile. Today modern diesel and electric locomotives do a faster, safer and more economical job for an average of 1½ cents per ton mile. Steam locomotives have virtually disappeared from the American scene . . . they are memorable antiques.

HOW MODERN ARE YOUR WEIGHING METHODS?

Do you place your trust for accurate, but speedy and efficient weighings on outmoded equipment? Are you weighing on "memorable antiques"?

Let us show you what modern equipment can do for you. Write to us today for our complete file on the full line of METTLER balances.
